Why Mlops Topic ① and lifecycle

Ops

— CI

— CD

— Serverless

— IaC

— Monitoring & Instrumentation

① CI

run automated tests whenever you push

② CD

automatically ship to environments using IaC so changes are versioned

③ Serverless

small deployable production services
Fast API

④ IaC

declare cloud resources in code → consistent repeatable environments

④ monitoring

collect latency errors and improve
Kaizen Mindset

ML LIFE CYCLE

DATA

build and reuse standardized features
in a feature store. prevents train-serve
skew. also supports a/b testing monitoring
vertex AI feature store

TRAINING

track code, experimentations, versions,
parameters to make it reproducible
